

# Conflict of Interest

## Confidence in Accepting Cases

Omega Legal's Conflict of Interest exposes potential conflicts within a split-second. The right information is available when you need it - right now - to make an informed decision on whether a conflict exists.

## Full-Text Search Engine

All of the words found in your Omega Legal InterSystems Caché® database are indexed so that Conflict of Interest searches the indexes, rather than crunching through the entire database, to find its hits. There's no time to grab a cup of coffee while you wait for results anymore. Indexing provides lightning-fast search results. Real-time indexing is employed so that searches are performed against up-to-the-minute data.

## Thorough Searches

You never know where a name may have been referenced in your database. In addition to system-wide contacts (clients, related parties, marketing associations, vendors) and client/matter information, you can choose to search data found in addresses, billed or unbilled fee and cost entries, file folders, docket events, case notes, and even names stored in previous searches. Be confident that if the data exists, it will be found.

## Multiple Search Options

It's a fact of life that data isn't always entered consistently or correctly. Don't worry; your searches won't have to suffer because of that. Boolean, phonetic, and proximity search options, along with wildcards, help overcome limitations when you're not sure how text is entered or spelled.

What constitutes a good search? Let your comfort level be your guide and choose a search option that produces the most hits, the most relevant hits, or something in between.

### Features

- Real-time indexing
- Lightning-fast search results
- Search in select or all areas of the system
- Search for unlimited terms in a single query
- Drill-down on results
- Flexible reporting

### ***Search Multiple Terms at Once***

You can quickly search for a name while you're on the phone with a prospective client. You can just as easily search for multiple names at the same time in a single query. Dreading the time it will take to input and search hundreds, even thousands, of names involved in a large class action case? Omega Legal enables you to load and process large-volume searches in no time at all.

### ***Interactive Searches***

Search results are displayed online with drill-down capability to the source of an individual hit to re-search additional information. You can easily modify your search criteria and rerun it to return more relevant hits. For reporting purposes, you can even hide clearly irrelevant hits.

### ***Flexible, Customizable Reporting***

In addition to reviewing results online, seven standard reports are available that include the most common information needed to make a determination on whether a conflict of interest exists. Since no two firms will necessarily agree on exactly what a report should contain, there is a flexible report writer so you can customize any report to meet your firm's specific needs.

### ***Faster Routing for Evaluation***

Conflict reports can always be printed and distributed the old-fashioned way. However, with one click, a report can be electronically attached to an e-mail for you to send to the appropriate people for evaluation.

### ***Proof of Search = Peace of Mind***

Satisfy your liability insurance carrier as well as yourself. All search parameters (who, what, where, how, when) and results can be stored indefinitely without affecting system performance. Review and print previous searches (even if there were no hits) in their original state or re-run them against more current information.

*"The icon to execute a search in Omega's conflicts checking module is a lightning bolt. That's not just hype; Omega's searches are lightning fast. As Moye White's in-house ethics counsel, I need and appreciate that kind of speed. Omega delivers."*  
C. Luce, Jr., partner, Moye White LLP

### ***Omega***

*Omega is a privately held Scottsdale-based company that provides mid-to-large size law firms an integrated financial and practice management software suite that sets the standard for return on investment, system performance and service. Since 1975, Omega has been solving critical business issues for law firms, improving their profitability, productivity and efficiency.*
