California's Eclipse Group to Convert Four Offices to Omega Legal

Firms Lauds Omega's Integration, Flexibility, Customization

PHOENIX—February 23, 2006—Omega today announced that The Eclipse Group, a growing intellectual property firm based in Los Angeles, has chosen to convert its four offices to Omega Legal, an integrated financial and practice management software system. According to managing partner Jennifer Hamilton, the firm—with 9 attorneys and 15 timekeepers in offices in Los Angeles, Orange County, Calif., Chicago, and Durham, N.C.—needed an integrated package that enabled remote time entry, and accurate bills and reporting by office without manual intervention.

"We selected Omega because it is a highly customizable and integrated time, billing and accounting system, which is critical to keeping our offices running smoothly and profitably," Hamilton said. "Other available systems did not provide the flexibility or customization Omega offers, which made the decision to adopt Omega Legal quite simple for The Eclipse Group."

Omega Legal is an integrated financial and practice management software system that enables instant access to a firm's most up-to-the-minute financial, statistical and historical information from a single server. Based on the powerful and scalable InterSystems Caché™ post-relational database, there are no performance issues, even when generating month-end bills or detailed financial reports.

About The Eclipse Group: In September 2002, in response to a strong and long-felt need to provide clients with high-quality, personalized legal services at affordable rates, the founding attorneys formed The Eclipse Group. The firm's philosophy is to hire experienced, driven attorneys that strive to respond to clients' business needs and offer personalized and tailored services that fall within their budgetary constraints. In an effort to provide clients with superior service, the attorneys at The Eclipse Group take the necessary time to access and understand its clients' business goals. The attorneys strive to continually offer clients legal strategies for protecting and enforcing intellectual property rights and for structuring business transactions that provide value and financial gain to their businesses. More information can be found at www.eclipsegrp.com.

About Omega: Since 1975, Omega's integrated financial and practice management software has set the standard for return on investment, performance and service for discerning law firms. With timekeeping, billing and reporting, Omega Legal will help meet client demands, improve productivity and manage your cash flow every time with no hassles.
