Omega Announces Integration with iTimeKeep iPad and iPhone Apps, Providing Automatically Synchronized Time Entry from iPads and iPhones

SCOTTSDALE—December 6, 2011—Omega Legal Systems announces a new integration with Bellefield Systems' iTimeKeep iPad and iPhone applications.

Using iTimeKeep, Omega customers can now enter time directly from their iPad or iPhone via wireless connection and their entries automatically synchronize and register in Omega Legal's financial management system in real time. Also, when new clients, matters, tasks and activity codes are added to Omega Legal, iTimeKeep immediately renders them visible on the iPad or iPhone. Cloud-based iTimeKeep applies multiple levels of security to ensure that data is transferred safely from one system to the other.

Setup for the integration is straightforward. Omega clients simply download the free iTimeKeep app from the Apple Store and Omega sets up the integration on the database back-end.

"We announced iTimeKeep at our Educational Conference and the response was exceptional; John Kuntz from Bellefield Systems was swamped with our clients getting demonstrations and information. They were excited to be able to offer iPad and iPhone time entry to their attorneys," said Keith Gall, vice president, Omega Legal Systems.

According to John Kuntz, Principal and Co-Founder of Bellefield Systems, "Recent statistics show that lawyers 'leak' significant billable time by not capturing time entries immediately, and this can cost them and their firm thousands of dollars per attorney per year. iTimeKeep changes the game by enabling professionals to enter time instantly from their iPads and iPhones, and now they can send those entries directly to the Omega Legal financial systems database so the time can be billed promptly. Our mutual customers and the law firms they work for will benefit greatly from this connection."

About Omega Legal Systems, Inc.
